PROFESSIONAL SUMMARY

Frontend Developer with 3+ years of experience building high-performance, responsive web applications using React.js and modern JavaScript (ES6+). Proven track record of reducing load times, improving test coverage, and delivering scalable ad tech solutions in agile environments. Skilled in RESTful API integration, state management with Redux, and translating UI/UX designs into clean, maintainable code.

EXPERIENCE

Cognizant

Chennai, India

Associate — Frontend Developer

Jan 2023 – Feb 2026

- Accelerated delivery of scalable ad tech features, cutting development time by 20%, by architecting responsive React.js interfaces with React Router and Redux for global state management across large-scale applications.
- Reduced code duplication by 30% by building a reusable component library integrated with RESTful APIs, handling asynchronous data flows and ensuring consistent cross-browser compatibility across all major browsers and devices.
- Improved application load time by 25% by applying performance optimization techniques — lazy loading, tree shaking, and Webpack-based bundle analysis — across production-grade front-end builds.
- Maintained 95%+ unit test coverage by writing comprehensive test suites with Jest and React Testing Library, enforcing clean, maintainable code standards with HTML5, CSS3, and TypeScript.
- Reduced bugs by 15% and improved team productivity by standardizing agile coding practices, improving documentation, and championing UI/UX sensitivity throughout the design-to-code translation workflow.

PROJECTS

Shopping Cart | React.js, Redux, RESTful APIs, JavaScript (ES6+), HTML5, CSS3

- Built a fully responsive e-commerce shopping cart integrating RESTful APIs for real-time product data, with features for product listing, add/remove items, and quantity management for an intuitive cross-browser user experience.
- Implemented Redux for global state management and React Hooks for lifecycle control, achieving a modular, scalable architecture optimised for future enhancements.

TaskMate — Task Management App | React.js, Tailwind CSS, JavaScript

- Developed a responsive task management app with task creation, deletion, and status tracking using React.js and Tailwind CSS, applying component-based architecture for dynamic, accessible UI elements across devices.
- Leveraged React Hooks and Context API for lightweight state management, keeping the codebase clean and maintainable without the overhead of a full Redux setup.

EDUCATION

Vel Tech High Tech Dr. Rangarajan Dr. Sakunthala Engineering College

Chennai, India

Bachelor of Engineering — Electronics and Communication

2018 – 2022

Grade: 8.09 / 10

Relevant coursework: Problem Solving, Python Programming, Data Structures, Algorithms, Linear Algebra

SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3

Frameworks & Libraries: React.js, Redux, Context API, React Router, React Hooks, Tailwind CSS

Tools & Build: Git, GitHub, Webpack, Vite

Testing: Jest, React Testing Library

Practices: RESTful API Integration, Responsive Design, Performance Optimization, Agile / Scrum, Cross-browser Compatibility
